PP-FCTA

Hidden T-Bar Frame Adapter

Designed to sit hidden above the ceiling tiles within the T-bar of a standard suspended ceiling frame, the PP-FCTA allows the installer a myriad of location possibilities for projector mounting. With over 9“ of continuous movement, the plate allows for precise placement of a projector.

Wingnuts allow for easy movement of the 1 1/2” pipe coupler for easy relocation without dragging your entire toolbox into the rafters with you. Security screw holds threaded pipe securely in place for added safety.

Our unique electrical knockouts accept almost any electrical box, offering electricians maximum flexibility when wiring.

Adapter works with PBM, PDS, PBC and MAG-PRO projector mounts.

PP-FCTA hooks into existing T-Bar frame above the tile and can be placed almost anywhere within the frame.

A completed install shows how clean and uncluttered your installation can appear.
(Shown with a PBC-UMS - ordered separately)

Hidden T-Bar Frame Adapter

- Hides above ceiling tile
- Allows flexible placement
- Includes dual-knockouts
- Includes Escutcheon Ring
